To Whom It May Concern,

I am writing to introduce Lavender Lily and to highlight how wonderful and inspiring her program is that she does with the children.

I have expressed my thanks to Lavender Lily for sharing her movement program with our children at Kookaburra and was impressed by her ability to involve and engage with all the children and motivate them to try different moves and dances.

What I loved the most is the way she flowed with the group, altering the explanations or demonstration of a movement activity to include all the children's learning styles.

Her teaching style is supportive, innovative and professional.

Her movement sessions with the children provided a great opportunity for me to identify how each learns best and what the children responded to, even those that are usually reluctant to join in this type of activity.

I also liked that the program works with the basic human movement patterns complementing what our Munch and Move program offers.

The creative and engaging way she included the hinge, squat, crawl, the twist which supports skipping, cross patterning, hop is unique and fun.

The children particularly liked growing dinosaur tails, the kangaroo hinge adventure and the frog story.

I would not hesitate to recommend her to other schools and Early Childhood Services.

Please contact me if further information is needed.

Thanking you,

Kerrie Lovegrove. Dip.Tch.E.C.E
